

ADVANCED AGRILYTICS

# Joining The Team In Their Own Words

Our team members join Advanced Agrilytics for a variety of reasons. We asked some of our newest team members why they were excited to join the company. Here's what they had to say...

## Hannah Beck, Precision Ag Specialist in Iowa

*"I was an Advanced Agrilytics intern in 2022 loved it! The company is full of good people who share the same goal: to help farmers succeed in their operations. I knew I would join a team that would provide me with numerous learning opportunities as I navigate my first job right out of college."*

*"What excites me most about working at Advanced Agrilytics is its focus on personalized solutions. Instead of using a one-size-fits-all approach, they look at each acre, even down to the sub-acre level, to find the best ways to boost productivity."*

## Kaden Brackman, Precision Ag Specialist in Ohio

*"Many people I respected in the ag industry talked about Advanced Agrilytics' commitment to teaching the next generation of industry professionals. As I was looking to enter the workforce after college, I was inspired by the company's commitment to helping farmers realize the potential of their acres. This company is enveloped by a passion for agronomy and teaching at every level, and everyone truly believes in the future of agriculture."*

## Madison Westerfield, Precision Ag Specialist in Indiana

*"I was an intern with Advanced Agrilytics in 2024 and loved it. In a short three months, I saw the company's mission, values, and practices come to fruition. Advanced Agrilytics changed the way I think about agronomy for the better. What excites me most about working at Advanced Agrilytics is the opportunity to help and serve the people who put food on our tables and clothes on our backs."*

## Kendall Mayall, Precision Ag Specialist in Indiana

*"Advanced Agrilytics is committed to helping farmers better their operations, and each farmer is taken seriously with their own needs for their operation. The team here is committed to creating customized solutions for each operation and wants every customer to succeed. Farm management is taken to the next level, and our team focuses on each acre and sub-acre within the field. I quickly learned how the company's unique approach makes them stand out, and I have gotten the opportunity to see the principles of agronomy and precision ag through a new perspective. I am excited to join this team and help farmers improve their operations!"*

## Kaden Hanscel, Precision Agronomist in Illinois

*"I wanted to become a part of this team after seeing some of the recommendations and the approach Advanced Agrilytics uses. It's exciting to have such a powerful, unique tool that we can offer to growers – one that will truly better their operation."*

## Mallory Comely, Precision Ag Specialist in Indiana

*"What excites me the most about working at Advanced Agrilytics is the commitment to improving every farm we partner with. We are a company of people eager and ready to do right by farmers. Every field that Advanced Agrilytics touches is left better than when we found it. My peers' growth mindset and motivation to drive optimization of every acre make me excited to step into the field every day."*

## Eli Klockenga, Precision Agronomist in Illinois

*"I was captivated by Advanced Agrilytics' approach to agronomy and wanted to elevate my understanding. Advanced Agrilytics' methodology is what the precision ag industry has been looking for: accurately analyzing the environment spatially so we can influence it correctly, down to the sub-acre."*
